UNIT.CITY: Innovation park for startups and tech companies

UNIT Factory is the Ukraine's only institution that works to the innovative standards of French School "42". Here people can learn how to code, enhance your team working skills and advance your creativity by looking for unique solutions. They don't have teachers, work-books or lectures. Academic degrees and grades are not taken into account during the application, only abilities and motivation. The education is completely free for all trainees' subject to compliance with the terms of the programme.
